

Toepassing van instructie software op smart safety glasses

Date: September 5, 2017
Liesbeth Sticker
Interreg - wearables

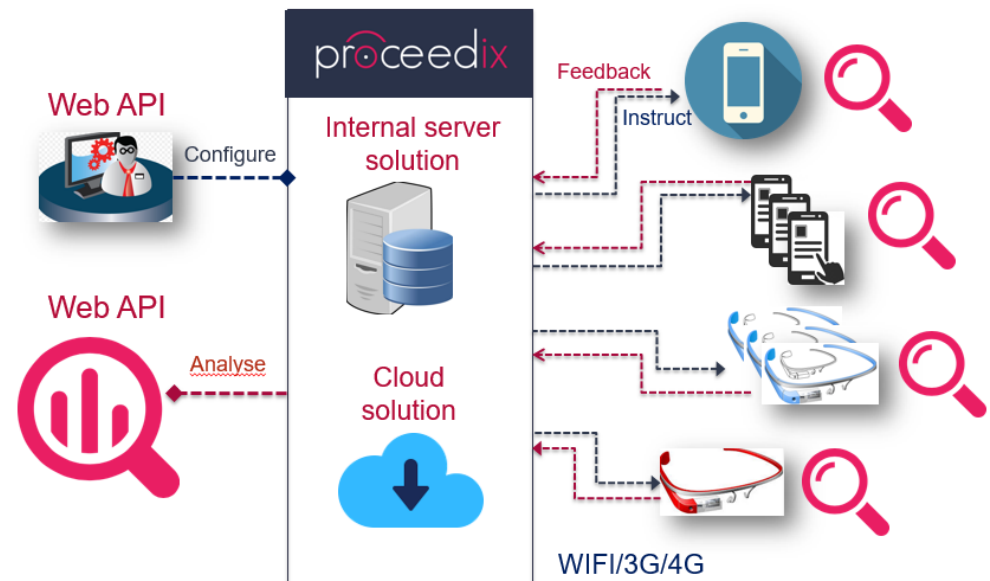

Your procedures, work instructions and checks finally made paperless and mobile

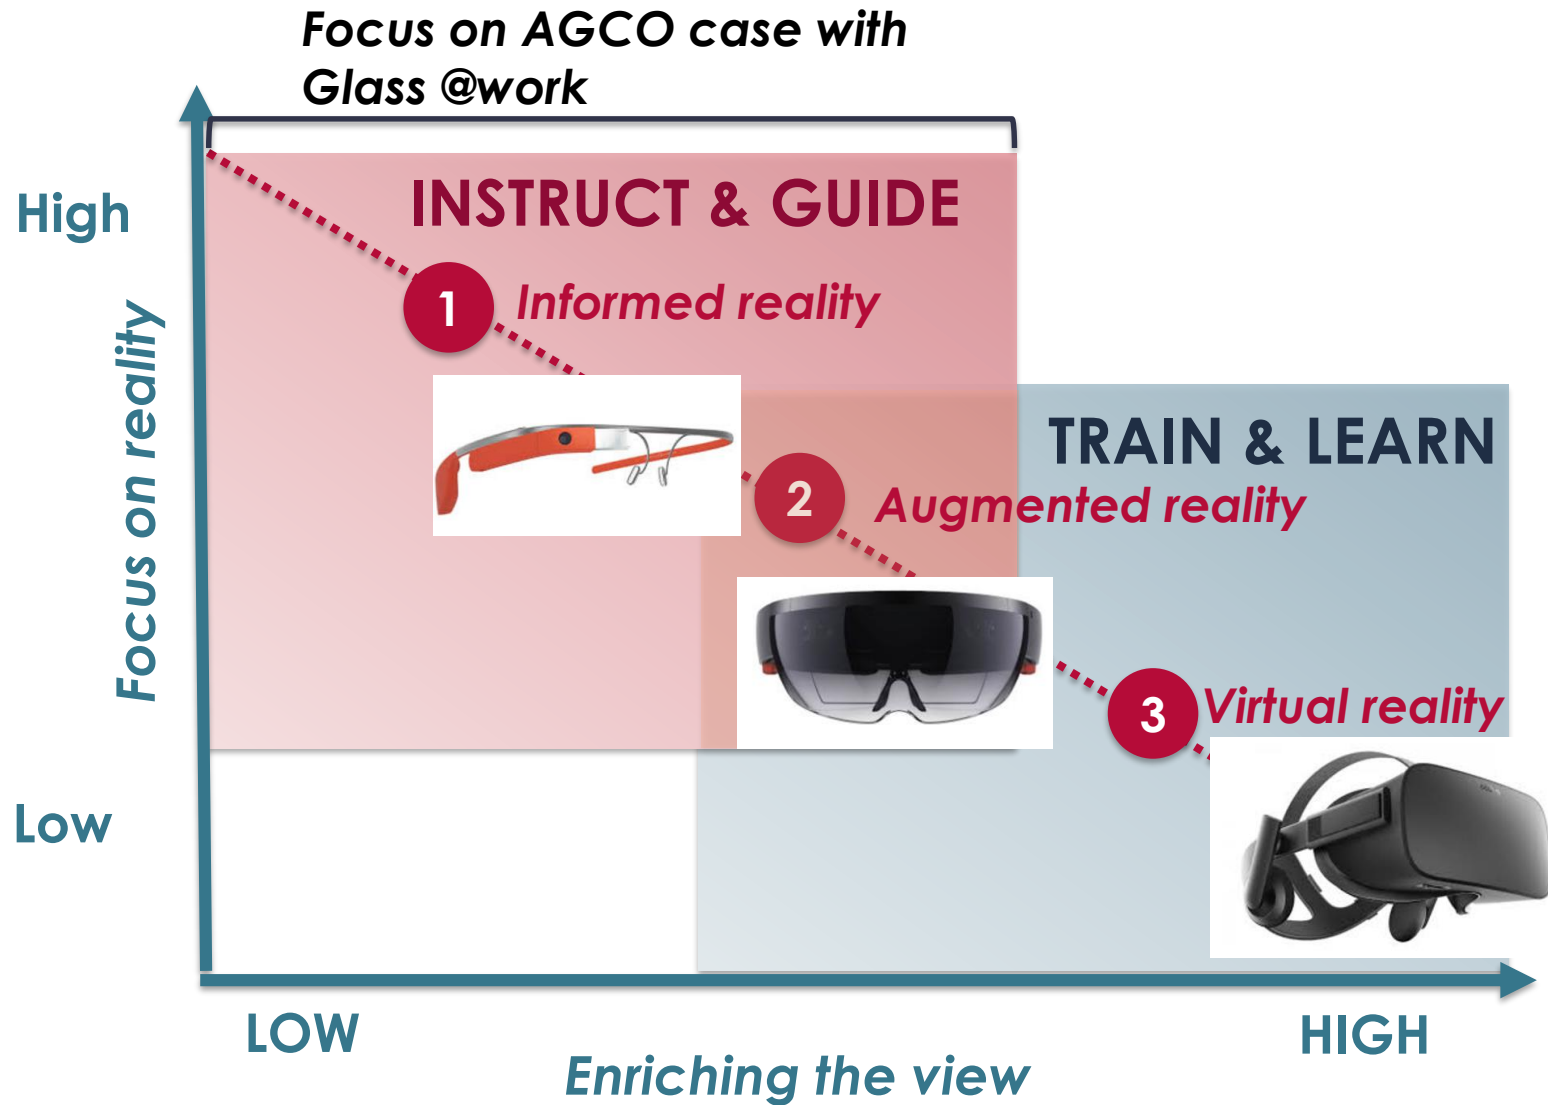

What we do: we remove paper on the factory floor

Our solution: Proceedix is a central platform to manage enterprise procedures, work instructions and inspections in an easy way, while making the remote execution paperless and mobile

Our mission: mobilize people and enable them to handle even their most complex processes away from their desk.

Partnerships: Glass, Iristick

Sector: Manufacturer

Products: agricultural equipment, tractors, combines, sprayers, hay tools

Revenue: 10 billion USD

HQ: Georgia, USA

Employees: +17.000

Wearable project

Plant: Jackson, USA

Employees: 1.000

Company culture: strong engagement of employees, continuous improvement & lean, collaboration

Paper factory (90-99%)

Digital factory (1-10%)

- ☒ Compliance
- ☒ Lean : first time right
- ☒ Work force evolution

- ☒ Industry 4.0 (IoT)
- ☒ Wearables wave
- ☒ UX mind set

2013: the digital enterprise

- Paper-free
- Hardware issues
- Google Glass announcement

2014: application research

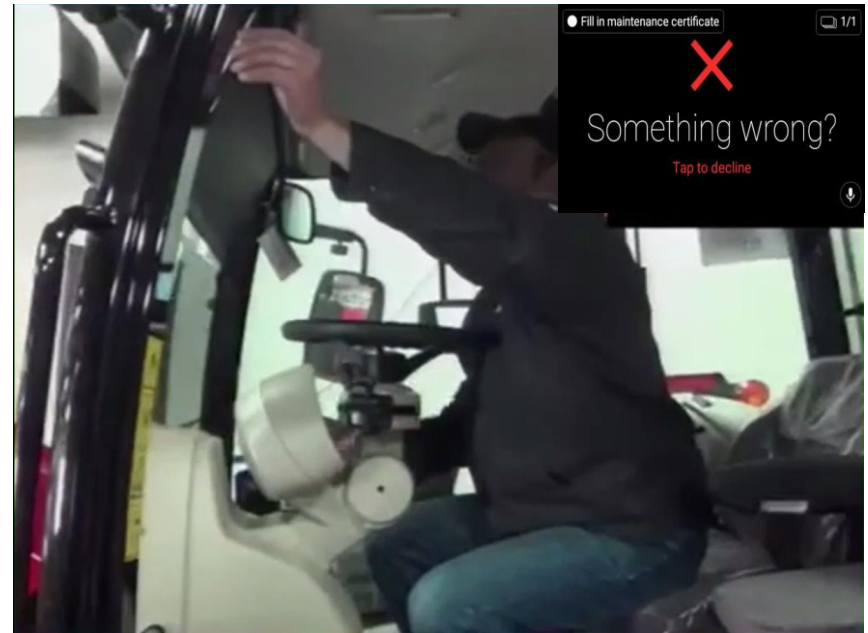

- Zero = # applications on the market for manufacturing
- Proceedix
 - Prove the usability of Google Glass (in corporation with 3M)

2015-2016: pilot

- Quality inspection
- Paint preparation
- Work assembly

2017: the connected enterprise

- ❑ Operators are now following quality checklists that are **tailor-made** for the type of unit they are inspecting (SRN)
- ❑ **Pictures and videos** can be recorded in a hands-free environment and are directly added to the unit's documentation through the use of the Proceedix Action Management system.
- ❑ When an operator **detects an issue**, they are able to assign an action within the system to an appropriate party to have it addressed immediately. (NCR)
- ❑ Interface to QMS

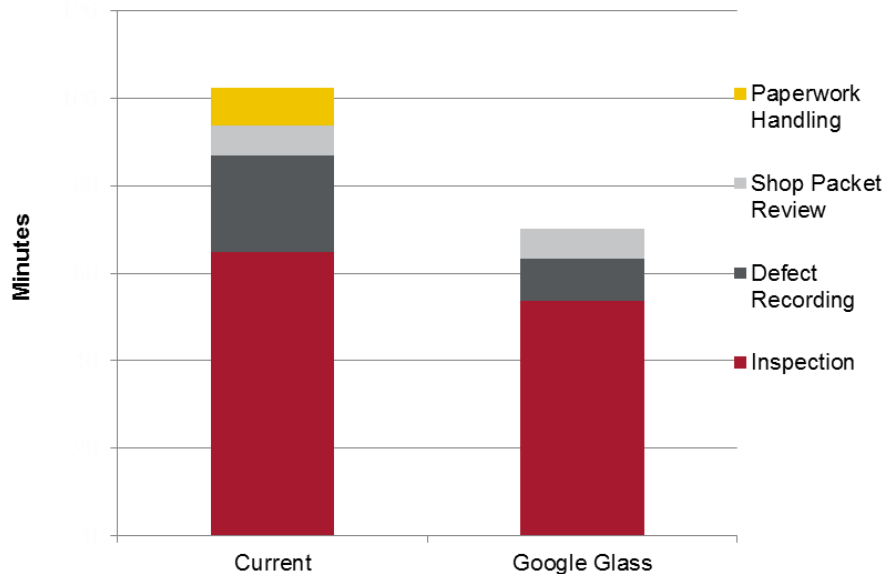

- ❑ Takt time: 70 minutes/tractor
- ❑ Every item has different configuration
- ❑ Work instructions
 - ❑ Previous: standard work instructions (SWI) are consulted on PCs more than 5 meters from paint preparation work
 - ❑ Current: Glass displays the same information exactly where the user needs it

Quality control

Average FFI Time

30% reduction per unit

Work instructions

- ☑ Manufacturing traceability
- ☑ Cross-functional execution and expertise
- ☑ 50% reduction in learning curve duration (*average reduction in total cycle time during learning curve is 25%*)
- ☑ Reduced quality issues, defects (*50% reduction on defects created during learning curve period*)
- ☑ 25-35% time savings

- ✓ Lessons learnt
 - ✓ Step by step implementation: learn fast, fail cheap
 - ✓ Connected enterprise
 - ✓ Combined solutions: tablet, glass, PCs
 - ✓ Every reality for their application: training vs. work floor

- ✓ Further exploring the potential of smart glasses
 - ✓ Field services
 - ✓ Supply chain logistics (inventory management, receiving, picking)

Procedures and instructions, finally made paperless and mobile

Run your company's latest procedures anytime, anywhere,
on Android Phone or tablet and Google Glass
